

THE OPINION of a foreign research supervisor on the dissertation of Kyrgyzkhan Gulbarshyn Aziskyzy on the topic "«Theoretical and practical problems of using digital technologies in teaching the history of Kazakhstan in grades 5-7 of a modern school», written for the degree of «Doctor of (PhD)» in the specialty «6D11400-History».

The world society is characterized by global socio-economic changes in connection with the transition to a new civilizational stage, the comprehensive introduction of information and communication technologies in all areas. Thanks to the introduction of digital technologies, educational information and communications form certain requirements that are rapidly entering the school system. Personal characteristics of students have changed significantly over the past decade. They are very well oriented, all kinds of gadgets today are an important part of children's lives. Therefore, today the main goal of the teacher is to master the rational use of digital technologies in the classroom, therefore the dissertation of Kyrgyzkhan G.A. on the topic «Theoretical and practical problems of using digital technologies in teaching the history of Kazakhstan in grades 5-7 of a modern school» is relevant.

Determination of the methodological basis for the development and use of computer learning programs on the history of Kazakhstan in the process of theoretical and experimental research of the research topic determines the methodological basis for the development and use of computer learning programs on history. This study deals with one of the most important issues of using electronic means in teaching history - the creation of computer educational programs on this topic.

The dissertation consists of 150 pages, introduction, 3 chapters, conclusion, list of references and appendices.

Dissertator.Kyrgyzkhan G.A achieved the following results in the course of work on her dissertation:

1. Compliance of the content of the study with the scientific apparatus;
2. Use a set of research methods;
3. Planned frequency of experimental studies based on the data obtained

The following scientific results were obtained in the dissertation:

Result 1. The structure and teaching of history at school, analysis of the content from the point of view of modern approaches;

Result 2. Stages of formation of historical knowledge and skills to determine the role of students in the formation of historical knowledge;

Result 3. To prove that new digital educational technologies are the key to quality education.

The use of practical learning results in the practice of higher and special educational institutions, institutes for advanced training and retraining of teachers and secondary schools in the educational process will allow students to master the use of digital learning tools and improve students' literacy in modern education.

The results achieved in the dissertation research can be assessed by the fact that they are built on mutual unity, integrity and systematic and meaningful communication.

Based on the research materials, 7 scientific articles were published, including 3 in journals approved by the Ministry of Education and Science of the Republic of Kazakhstan, the Committee for Quality Assurance in Education and Science, 1 in journals included in the Scopus database, 2 in international conference proceedings, 1 in foreign conference proceedings., 1 - Materials of the Republican scientific-practical conference.

It can be considered the work performed by the applicant in accordance with the level of a doctoral dissertation, during the scientific work of which she achieved the specific goals and objectives set for her.

In the proposed work, they found their solution as a scientific problem with high theoretical and practical significance that meets the requirements of today.

The dissertation on the topic "Digital educational means of teaching the history of Kazakhstan in the middle classes of a modern school" meets the established requirements. Kyrgyzkhan Gulbarshin Aziskyzy received a Ph.D. in the specialty "6D011400 - History".
